ABOUT US

Founded in 2000, our target is to satisfy our customers and innovate solutions for computer systems to reach the needs and wants of our clients to get their full satisfaction and earn their trust , so we must be updated with all the new products , services, equipments all over the world.

We are designed to invest our practical , technical and manual expertise to harness modern and advanced technology to serve and delight our customers.

Mission

We Innovate Solutions

As we promised ourselves from the start that our aim is to reach the maximum customer's satisfaction and build long term relationship with them. We provide our customers with the highest quality of products installed by well trained creative technicians.

We provide unique after sales services as well as suggesting creative , new ideas to solve our customers problems and obstacles using technology , so we consider this one of the most important roles where we adapt technology to facilitate , help and satisfy our customers on daily basis.

ELECTRICAL MAINTENANCE & CONSTRUCTION

HEALTHY ELECTRIC INSTALLATION

POWER SAVING SOLUTIONS

We provide electrical services for residential and commercial customers, from new wiring, to electrical maintenance, and even troubleshooting.

We are specialists in the service and installation of electrical systems, and have a comprehensive , knowledge of new technologies, as well as systems that have been installed for years.

Our qualified engineers with years of experience are sure to solve your electrical problem and will be able to satisfy your electrical needs first hand by assisting you with electrical maintenance and repair.

AUTOMATION SYSTEM

HOME MANAGEMENT AND CONTROL

Integrated Home Technology enables all technologies in your home to seamlessly communicate together in an intelligent way to simplify your life. It encompasses much more than just lighting and shade control. Today's modern home must combine lighting, climate, shades, home entertainment, security, and more on a single platform. Digital Interiors provides end-to-end control solutions engineered to deliver truly integrated home technology. The truly integrated home is now a reality. The result is one seamless, worry-free system that delivers an incredible user experience.

MEDIA ROOM SYSTEMS & DESIGN

All it takes is a vision, the right equipment and possibly a few alterations to the room's design. If your plan involves building equipment into the walls, having a screen descend from the ceiling and pressing one button on a touchscreen to start the show, we would love to help. Even if your ideas are elaborate, it never hurts to start thinking about which room you'd like to convert, what type of equipment you'd like to incorporate, and how you'd like the room to perform, we can also provide, [LASER TV & VIDEO PROJECTOR](#). And we can add a touch of unique lighting design with [FIBER OPTICS](#).

AUDIO VIDEO DISTRBUTED MUSIC & VIDEO SYSTEMS

Create a living area where your music clearly resonates throughout your entire home with a simple touch of a button. Speakers throughout the home along with the distributed video allow for unprecedented sound and picture everywhere in the home. And when whole-house A/V is integrated with a home automation system, you have it all at your fingertips.

LIGHTING

WHOLE HOUSE LIGHTING SYSTEM

Did you know that your home's lights can do more than simply turn on and off? When governed by the right set of smart devices, they can brighten and dim automatically, accentuate the architecture of your home, and set the mood for a special occasion, all with remarkably little effort on your part. One of the key benefits of a lighting control system is convenience. For example, you can turn off every single light in and around the house simply by touching a button by your bed. If you forget, the system can do the same at midnight. And that is a bound to save energy and money.

SAFETY

SURVEILLANCE, SECURITY & ACCESS CONTROL SYSTEMS

It is imperative in this day and age to take a proactive approach to home security with surveillance systems. They can now turn lights on, readjust a home's thermostats alert your cellphone to any suspicious activity, including not only break-ins and but also water leaks and drastic drops in the indoor temperature. Access control systems provide authorized individuals safe and secure access in and out of various parts of your home while keeping unauthorized people out.

IT NETWORK

WIFI & NETWORK SYSTEMS

Responsible networking is the Digital Interiors way. We provide our clients with the most reliable, high-performance, and efficient solutions possible. Today's A/V devices and appliances require reliable networks. Our products are reliable and stable, thus resulting in longer system up-time. Using access points that are enterprise grade which provide 2-3 times greater coverage than consumer grade access points and faster upload and download speeds.

Wired, Wireless and Fiber Optical Networking.

PHONE

PHONE SYSTEMS & CELL PHONE BOOSTERS

The goal of a cell phone signal booster is to take an existing cell signal, typically found outside your home and amplify the signal then broadcast it to an area which has weak or no signal. A cell phone signal booster system consists of an external antenna, a signal boosting amplifier and an internal antenna. Unfortunately, most situations are not ideal, so it's often necessary to choose a more powerful signal booster kit to compensate for a weak outside signal or inside obstacles that inhibit cell phone signal.

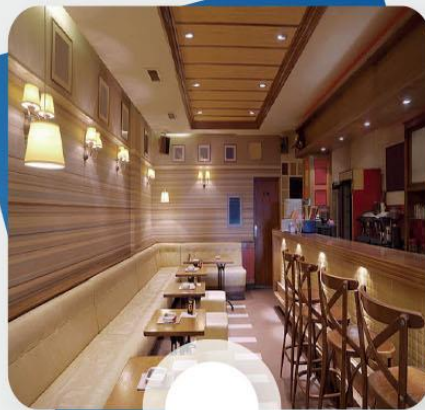

COMMERCIAL DESIGN & SYSTEMS

Most buildings today are over-lit because light levels are set higher than appropriate for the space, or spaces are lit even when they are unoccupied. This wastes energy, creates discomfort, and reduces productivity. Make your building work harder for you by adding intelligent, energy-efficient light control. We provide flexible, scalable systems that can fully integrate lighting, shading, and sensors for maximum energy savings. These solutions can be easily designed, installed and reconfigured to meet the changing needs of your building or business.

Your workplace lighting could be impeding your business growth. In most office buildings, lighting accounts for 39% of annual electricity use. The figures climb higher in specialized settings such as healthcare facilities (43%) and hotels (55%). As energy costs rise, creating an energy efficient workplace is top priority to every business.
